Front-End

- JavaScript
- HTML
- CSS
- React.js
- React Native
- Tailwind

Back-End

- Node JS
- Express
- MongoDB
- Firebase

CAREER OBJECTIVE

A Web Developer with years of experience, specializing in Front-End development using HTML, CSS, JavaScript, and React. Adept at building high quality websites and identifying opportunities to enhance the user experience. With an insatiable hunger for growth and a deep-rooted curiosity for emerging technologies, I am committed to advancing my skills and knowledge in this ever-evolving field. Eager to contribute to innovative projects and collaborate with like-minded professionals, my goal is to leverage my creativity, problem-solving abilities, and relentless drive to deliver exceptional web experiences.

PROJECTS

ChatWithUs

- <https://chat-with-us.netlify.app/>
- A React app that allow users to chat with each other and create rooms to invite multiple users at once.
- Uses WebSockets to send and receive messages between users instantly.
- Users can send and receive friend requests.
- All chats and messages are stored in a MongoDB database.

Hot Start Hunan Grill

- <https://hot-star-hunan-grill.netlify.app/>
- A React app for a Chinese restaurant with a full menu and online ordering.
- Payments are processed using Stripe.
- The order information is collected and stored in a MongoDB database and can be view later on the site.

React Native Recipes App

- <https://github.com/jonespinoza111/rn-recipes>
- A React Native app that uses the Spoonacular API to display instructions for cooking recipes.
- Users can save their favorite recipes to their favorites list to view them later.
- The recipes can be filtered through to find exactly what you're looking for.
